

Assignment

Project Milestone-1

Due on: Mar 6, 2025, 23:59

System Instructions

- You are given an extra 10 minutes after due time to submit this assignment. However, please note that any submissions made after the due time are marked as late submissions.

Assignment Question and Instructions

- Form a group of 2-3 people.
- Pick a problem for people/users, or an digital product that exists.
- Define what the scope of your final project will be (it has to be a needfinding – prototyping - evaluation cycle).
  - Could be for a new product / user problem (find user needs, prototype a new tool/product, evaluate).
  - Could be for an existing problem (evaluate, find gaps, prototype to solve some, evaluate)
  - Existing problems are documented, you build a working prototype, implement and evalaute.

WHAT TO TURN IN:

- 1 PDF per team.
- Mention team member names.
- Define what you'd do.
  - This for example would be something like: evaluate the usability of IRCTC for hotel booking, identify problems and redesign it to improve usability, and evalaute the new designs.
  - You are not allowed to pick IRCTC, or any other one we've used in previous assignments (IITK website, voter registration UI). Pick something unique and unusual. You're welcome to bring UIs from companies you intern with, your own product evaluation ideas, etc.
- A tentative timeline.
  - Pick a needfinding method (Interviews, Surveys, Observations, Review Analysis, Diary studies).
  - Mention what you'd produce (designs, implement a functional version)
  - Evaluation – we'll learn about its methods as we go, but it needs about atleast a week).
  - FYI: Final projects presentations will be scheduled for the finals week; No end-sem exam.

No answer files are uploaded. You can upload them below.
