System Instructions

- You are given an extra 10 minutes after due time to submit this assignment. However, please note that any submissions made after the due time are marked as late submissions.

Assignment Question and Instructions

1. Pick either the IITK DoAA website, or the ECI Voter web page: https://voters.eci.gov.in/
2. Redesign the content / layout based on principles of visual perception and what users might most need.
3. State assumptions you make, point where all content is moved.
4. If you remove content, rationalize why it doesn't belong and where it should instead go.
5. Turn in sketches (paper/pencil sketch is fine, but needs to be legible. You may also use your favorite digital sketching tool, if you want to.).

What to turn in & evaluation.

1. The homeworks are individual.
2. Turn in your sketches as one single PDF (scanned if on paper).
3. Submit on Hello IITK.
4. The evaluation will be based on your reasoning and the choices you make, completeness, and legibility of wireframes.

Useful resources:

1. Printable sheets for wireframing (pick desktop/mobile versions as you see fit; there are a variety of them; poke around). An example is: https://www.sketchize.com/.
2. Use approximations (Use place holders for text, images, etc. that are not salient. For example, you could simply say **Phone:** (+xx)-xxx-xxxx-xxxx) instead of being precise. See advice https://uxdesign.cc/ui-ux-sketching-techniques-101-7e91d854ae3d and The series at https://uxknowledgebase.com/ui-sketching-pro-tips-part-1-ux-knowledge-piece-sketch-8-5b28be92a55e

Note for students with disabilities:

- The deadline was originally set for Friday - 07 Feb 2025 as announced in class.
  The deadline is now moved to Sunday to allow extra time for students with Disability (and for anyone else who might need the extra weekend time due to various circumstances).
- If someone has a disability that might get in the way of sketching, please talk to the instructor.
